Blake Bagents.....(334) 429-1056

Heather Yates.....(334)429-0261

EPDs

All EPDs reported in this catalog are current as of September 2026 reported by the American Simmental Association.

Sale Terms and Conditions

Cash or check will be accepted on sale day. Each animal will be sold to the highest bidder. All cattle are to be paid for by purchaser immediately after the sale and will not be released until payment in full unless prearranged with BRF. Cattle papers will not be transferred until full settlement received. Buyers are strongly encouraged to haul bulls on sale day. BRF will hold bulls at buyers' risk until October 31, 2026 at no additional charge. Each bull remaining at BRF after this time will incur a daily boarding fee.

Health Certificates

All bulls will have an official identification and certified veterinary inspection for interstate transport upon request as needed.

Hauling

Hauling options are available for hire. Consult BRF to arrange hauling.

Announcements

All announcements at the sale by BRF will take precedence over information in the catalog.

Liability

All persons who attend the sale do so at their own risk. Black Rock Farm does not assume liability legal or otherwise for any accidents that may occur.

Guarantee

We cannot guarantee against injury, disease, mismanagement, or death. These are young, growing bulls and require a higher level of management than a mature bull. All bulls selling are guaranteed for fertility for the first breeding season or 6 months. In the event a bull's fertility is deemed unsatisfactory within 6 months of sale, the bull may be returned for a replacement bull of equal value if available or credit in the amount of the purchase price. All bulls selling have passed a BSE but should always be semen checked prior to turnout to ensure they are in proper breeding condition. Please contact BRF about any issues prior to culling the animal. A signed veterinary statement will be required.

WELCOME!

The Bagents family would like to welcome you to Black Rock Farm for our fourth annual bull sale. What an exciting time to be in the cattle business! The cattle market remains high, and we are hopeful it will continue. For over 40 years we have been shipping steers to feed yards and selling replacement heifers and herd bulls to cattle producers all while working hard to provide quality cattle to customers that would add value to their herd.

This year we are excited to again offer a set of bulls that represents years of genetic selection through using leading AI Sires. Our goal has always been to provide functional bulls that are docile, heavily muscled, and loaded with growth while still having balanced EPDs. This year the bulls have genomically enhanced EPDs and have been parentage verified. We have also focused on carcass EPDs to help pass on these sought after qualities to our customers. Whether you need a low birthweight bull for heifers or a bull to service mature cows, we hope you will find one that will work in your program.

We continue to be a work in progress. We are dedicated to improving our herd, and hopefully we will pass these improvements on to our customers. A special thanks to our past customers for allowing us to be a small part of your cattle program. We look forward to working with and getting to know our new customers. God has blessed us with wonderful friends, family, and the opportunity to make a living doing what we love—raising cattle! Thank you so much for coming today, and we hope you enjoy the sale!

~ Mike and Lora Gail ~

Frequently Asked Questions

What do you feed the bulls?

We have been feeding about 15-20 pounds per head per day of CPC Developer feed from the Alabama Farmers Cooperative as well as free choice hay and minerals.

Do I still need to feed these yearling bulls?

YES! Because these bulls are young and still growing, they will need to be supplemented with feed, grazing, or a combination of both. This is especially necessary when they are turned out to breed cows.

How many cows can these bulls service?

After the bull's BSE is completed and found to be satisfactory, he can handle one cow per month of age until he turns 2-2.5 years old. After this time, he can handle one cow for every CM his scrotal circumference totals, up to 35 head.

Example: A bull from this sale can service 13 cows because he is 13 months old, and he can service 18 cows when he is 18 months old. When the bull is mature, if his scrotal circumference is 40, he should be able to breed 35 cows in a 90-day breeding season.

**Special
thanks to
First South
Farm Credit
in Luverne
for helping
provide a
delicious
lunch for us!**
